

What's New With The Program?

What Have We Been Up To?

Phase 3 design visits for 11 single-family homes and 29 condos in Wheeling, IL have been completed as of January 2026. We will be advertising for the construction for these homes in February 2026. We anticipate the successful contractor to begin construction work in the Summer of 2026.

We conducted additional noise testing in Wheeling and Prospect Heights in October of 2025. From that testing, 23 single-family homes in Wheeling and 18 condos in Prospect Heights have qualified for sound insulation. We will begin design visits in April of 2026. We anticipate construction for these homes to be late 2026/early 2027.

What's Next?

We will be conducting noise testing later in 2026. We encourage residents to reach out to our Program Manager, Penny Merritt, for information on the sound insulation program. We have several properties in Prospect Heights that we have not received many applications from to date. We want to ensure that everyone that is within the program contour has an opportunity to participate. You won't know unless you inquire!

653 Applications To Date

Please submit your application if you have not done so already.
